

Entuity Network Analyzer for BMC TrueSight Operations Management

NETWORK INTELLIGENCE YOU CAN TRUST

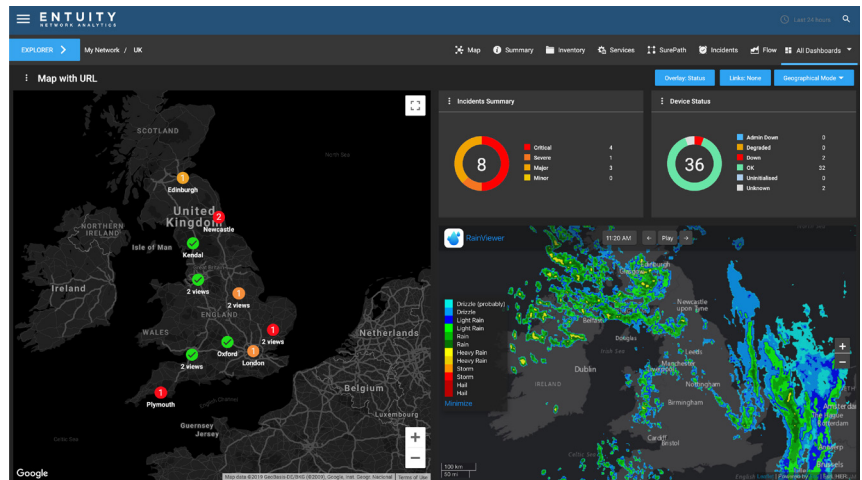

Fix quickly. Monitor proactively. Manage efficiently.

Deliver outstanding end-user experiences

- ✔ **Reduce Management Complexity**
Entuity Network Analyzer (ENA) simplifies network performance monitoring so you can concentrate on delivering great end-user services
- ✔ **Achieve More Uptime**
Go from reactive to proactive. Keep your network functioning optimally before problems become issues
- ✔ **Lower Costs**
Outage costs add up quickly. Put an end to outage mishaps with real-time discovery and key analytics

Product Highlights

- ✔ Enterprise scalability. Federated architecture for seamless expansion
- ✔ Supports Multi-tenancy including overlapping IP addresses for management from the same server
- ✔ Custom dashboard builder allows IT organizations to uniquely manage their networks
- ✔ Always-on business services require always-connected management. 100% mobile enabled for management from laptops, smartphones, tablets
- ✔ ENA Integrates with BMC TrueSight Operations Management ensuring that applications, the network and services are optimally performing

ENA dashboards provide concise, easy-to-understand customizable data for network management.

Insights that drive business success

Entuity Network Analyzer is a powerful, easy-to-use enterprise network analytics solution designed for organizations to maximize network performance and service availability.

Rapidly changing heterogenous networks require faster insight for faster resolution. Entuity Network Analyzer:

- reduces alert noise so you can focus on what is important to you
- fixes issues quickly and gets to the root cause using real-time analytics
- allows for proactive management with predictive trends
- supports a multi-cloud strategy.

ENA is easy to install, customize and maintain and lowers total cost of ownership to a fraction of other products. When ENA is integrated with BMC TrueSight, IT teams gain a far-reaching management platform delivering a uniform way to share network infrastructure data for application and service monitoring. Today's digital applications rely on a well balanced, integrated management strategy – one pane of glass – visibility to ensure an outstanding customer experience.

Entuity Network Analyzer includes everything you need to manage your digital environment including:

- ✔ Auto Discovery and Inventory
- ✔ SurePath Application Path Monitoring
- ✔ Live Topology and Geographical Maps
- ✔ Events Management
- ✔ Root Cause Analysis
- ✔ Configuration Management & Monitoring
- ✔ Multi-cloud support—AWS, Azure
- ✔ Seamless and Infinite Scalability
- ✔ Elemental Performance
- ✔ Integrated Traffic Flow, NBAR
- ✔ Customizable Reporting/Dynamic Dashboards
- ✔ Integrated Virtual/Physical Management
- ✔ 100% Mobile Responsive
- ✔ BMC Product Integrations, Remedy Single Sign-On

ENA/BMC Integrations

The powerful association between ENA and BMC solutions allow users to better monitor application health by detecting potential network problems that may be affecting application service delivery. ENA integration modules are also available for the following BMC products:

- ✔ BMC TrueSight Network Automation
- ✔ BMC TrueSight Capacity Optimization

The integration of ENA with BMC products equips BMC customers with a single pane of glass, comprehensive, and uniform management capability. This integration leads to improved performance, operational efficiency, outstanding end-user experiences, as well as, more value from all products.

What Our Customers Achieve Using ENA and BMC TrueSight

"70% reduction on time spent managing the network."

Bank Vontobel

"We've been able to provide an end-to-end customized solution to meet our customers' individual needs. ENA monitors the network in real-time, and it has allowed us to keep customer satisfaction at high levels by giving them deep insight into what's happening on their network. We're impressed with ENA's capabilities."

Tait Communications

"ENA and its integration with BMC TrueSight allowed us to consolidate a lot of functionality that used to be spread out across many locations. It helped us move from a disjointed set of tools that were expensive to manage, to a centralized way of monitoring the entire network consistently, proactively, and efficiently."

Vattenfall

ENA Built-In Modules Supply Specialized Functionality

ENA contains modules for specific management capabilities: SurePath Application Path Monitoring, IBM BladeCenter, QoS, MPLS, Firewalls, Cisco Unified Communications Manager, Cisco IPSLA, Wireless, Cisco ACI, High Availability, Routing Protocols, Flow, NBAR and VPN Gateways.

Network Management for Today and Tomorrow

Representing a solid alternative to multiple disparate network tools and expensive platform solutions, Entuity Network Analyzer is known for its short training time, and ease of management and administration. It adapts to how you wish to manage your environment and is up and running within hours. For more information visit: entuity.com.
