

Entuity Network Analytics

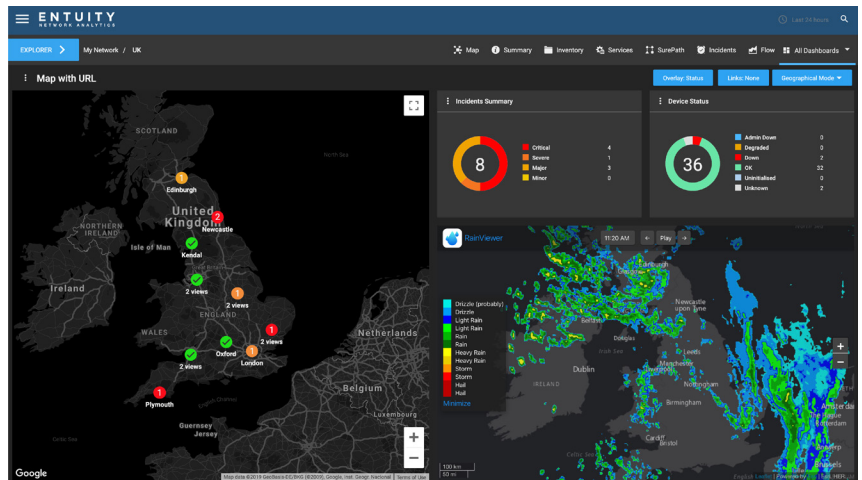

NETWORK INTELLIGENCE YOU CAN TRUST
Fix quickly. Monitor proactively. Manage efficiently.

Deliver outstanding end-user experiences

- ✔ **Reduce Management Complexity**
Entuity Network Analytics (ENA) simplifies network performance monitoring so you can concentrate on delivering great end-user services
- ✔ **Achieve More Uptime**
Go from reactive to proactive. Keep your network functioning optimally before problems become issues
- ✔ **Lower Costs**
Outage costs add up quickly. Put an end to outage mishaps with real-time discovery and key analytics

Product Highlights

- ✔ Enterprise scalability. Scales easily, federated architecture for seamless expansion
- ✔ Supports Multi-tenancy including overlapping IP addresses for management from the same server
- ✔ Provides industry's best custom dashboard builder to reflect how IT organizations manage their networks
- ✔ Always-on business services require always-connected management. 100% mobile enabled for management from laptops, smartphones, tablets
- ✔ Integrates with 3rd party vendors—BMC, Dell, ServiceNow, Oracle, Moogsoft, Splunk and more

ENA dashboards provide customizable, concise, easy-to-understand data for network management.

Insights that drive business success

Entuity Network Analytics is a powerful, yet easy-to-use enterprise network analytics solution designed for IT organizations to maximize network performance and service availability.

Rapidly changing heterogenous networks require faster insight and faster resolution. ENA:

- significantly reduces alert noise so you can focus on what is important
- resolves issues quickly and gets to the root cause using real-time analytics
- delivers proactive management with predictive trends
- supports a multi-cloud strategy.

ENA is easy to install, customize, operate and maintain, and lowers total cost of ownership to a fraction of other products.
